### **Description**

The Saw Horse is an ordinary wooden “saw horse” consisting of two triangular pairs of “legs” connected by a long, thin plank (the “body”). Its “eyes” are knots in the wooden plank. Its “mouth” is a place where the wood has been chopped away. It has “ears” fashioned from pieces of bark, and its “tail” is a tree branch still protruding from one end of the plank forming its body.

### **Background**

Mombi magically animated the Saw Horse to help carry things to and from her shop. She fashioned the “ears” so that the creature could hear her commands.
